Intelsat Government Solutions Corporation Integrates COMSAT General Business; Changes Name to Intelsat General Corporation

Washington, DC, November 18, 2004 – Intelsat Government Solutions Corporation today announced that it has changed its name to Intelsat General Corporation, following its recent acquisition of the assets, contracts and staff of the former COMSAT General business. The change is intended to reflect the complementary nature and competencies of the two businesses, as well as their dual heritage of success and worldwide brand recognition in the satellite communications industry.

Intelsat General Corporation and its affiliates completed the acquisition of the COMSAT General business from Lockheed Martin Corporation in late October of this year.

Intelsat, Ltd., in its 40th anniversary year, is a global satellite communications pioneer, with a worldwide network of 28 owned and operated satellites, plus teleports and terrestrial interconnections. In 2003, it created Intelsat Government Solutions Corporation as a Washington, DC-based subsidiary focused on the communications needs of key prime contractors serving US and NATO government users with satellite and managed satellite-based services.

Prior to its acquisition by Intelsat, the COMSAT General business had a 30-year history of serving government and commercial customers requiring quick response, high availability and fully integrated communications solutions. Its expertise includes the design, engineering, installation, implementation and licensing of end-to-end, fixed and mobile satellite telecommunications networks. COMSAT General communications solutions leverage bandwidth from multiple commercial satellite system operators and networks have been provisioned in over 100 countries on six continents.

"Uniting two great businesses under one banner, Intelsat General Corporation looks to continue an important legacy of success by enhancing its portfolio of world-class, cost-effective, secure communications solutions, backed by exceptional service," said Susan Miller, President, Intelsat General Corporation. "The addition of COMSAT General's staff and contracts strengthens and deepens our competencies to serve customers, while positioning Intelsat General Corporation as a leader in the provision of end-to-end, on-demand broadband satellite communications infrastructure and services supporting fixed and 'on-the-move' government and military applications."

About Intelsat General Corporation

Intelsat General Corporation, an indirect, wholly owned subsidiary of Intelsat, Ltd., provides communications solutions that leverage fixed and mobile satellite systems and associated terrestrial communications services to meet high-availability requirements on extremely short notice. Intelsat General Corporation offers satellite and terrestrial capacity, teleport and co-location services, customized satellite network communications design, network and transponder management, network engineering, capacity planning, host nation agreement support, mobile and portable terminals, deployment planning, and satellite data circuit provisioning. Some of the statements in this news release constitute "forward-looking statements" that do not directly or exclusively relate to historical facts, including statements relating to the enhancement of Intelsat General Corporation's competencies to provide services to the government and commercial sector. The forward-looking statements made in this release reflect Intelsat General's intentions, plans, expectations, assumptions and beliefs about future events and are subject to risks, uncertainties, and other factors, many of which are outside of Intelsat General's control. Important factors that could cause actual results to differ materially from the expectations expressed or implied in the forward-looking statements include known and unknown risks. In connection with the recent acquisition of the COMSAT General business, known risks include, but are not limited to, the inability to retain and continue to serve successfully customers gained in connection with the transaction and the failure to achieve Intelsat General's strategic or financial objectives for the transaction. Detailed information about other factors that could cause actual results in the communications business, such as that of Intelsat as a whole, to differ materially from the expectations expressed or implied in the forward-looking statements made in this news release is included in Intelsat, Ltd.'s annual report on Form 20-F for the year ended December 31, 2003 on file with the U.S. Securities and Exchange Commission. Because actual results could differ materially from Intelsat General's intentions, plans, expectations, assumptions and beliefs about the future, you are urged to view all forward-looking statements contained in this news release with caution. Intelsat General does not undertake any obligation to update or revise any forward-looking statements as a result of new information, future events or otherwise.
