

FOR IMMEDIATE RELEASE

INTELSAT GENERAL CORPORATION TAPS INDUSTRY VETERAN AS ITS NEW VICE PRESIDENT OF SALES

Bethesda, Md. – November 28, 2006 – IntelSat General Corp., a leading provider of broadband satellite solutions and networking services to commercial and government clients, has named Thomas L. Foust as its new vice president of sales. Foust will be responsible for IntelSat General's sales to government organizations, including the Department of Defense, NATO, and civilian and intelligence agencies. He will report directly to Kay Sears, senior vice president of sales, marketing, and business development.

"With Mr. Foust's vast experience and background, he has seen first-hand the importance of getting time-critical information to our country's warfighters," says Sears. "His military and commercial background, coupled with his business management skills complement our mission of providing our government customers with innovative solutions to meet their satellite and networking challenges."

Mr. Foust has spent more than three decades in the telecommunications industry – both in the military and the private sector. His service in the U. S. Air Force included positions as operations supervisor, program manager, and quality control supervisor at Rhein-Main Air Base in Germany. He also served as contracts manager for the Defense Information Technology Contracting Organization at Scott Air Force Base in Illinois.

After retiring from the Air Force, Mr. Foust worked for Satellite Communication Systems and later started 3N1 Communications, which he operated for three years. In 2001, he joined Verestar, where he was a key contributor to the creation of the Verestar Government Services organization (which now is part of Americom Government Services [AGS]). In 2005, Mr. Foust received the President's Award for his significant contributions in revenue growth and client service.

Mr. Foust has an Associate's Degree in Electronic Systems Technology and a Bachelor of Science in Management Information Systems. He currently is pursuing a Master of Arts Degree at Liberty University.

About IntelSat General
