

Intelsat General Names Mark Daniels Vice-President, Engineering & Operations

Bethesda, Md., February 19, 2008 – Mark Daniels, an executive with 24 years of broad experience managing engineering and operations groups in the satellite communication and aerospace industries, has been named Vice President, Engineering & Operations, of Intelsat General Corp., a wholly-owned subsidiary of Intelsat Ltd.

Mr. Daniels will provide resource management and technical leadership to the engineering and operations groups, overseeing the budget, recruitment, training, assignment, development, and execution of the Intelsat General engineering, program management, and teleport operations personnel. Mr. Daniels is also responsible for managing the Intelsat General Secure Operations Center (ISOC). In addition, he will provide technical advice to Intelsat General President William Shernit on a broad variety of satellite and telecommunications technologies and manage liaison activities with the Intelsat Ltd. engineering and operations management staff.

“We are pleased to have someone with Mark’s broad experience join us at such an important time,” Shernit said. “He will play a key role in the development and implementation of responsive solutions to meet our customer’s needs.”

During the last 10 years, Mr. Daniels served in senior program management, engineering management, and operations management positions at Verestar Government Services, PanAmSat, and ORBCOMM where he was responsible for the design, integration, implementation, operation, and maintenance of complex hybrid satellite & terrestrial communication solutions in the FSS and MSS industries.

Prior to that he served in group management, program management and engineering management positions at EER Systems where he was responsible for aerospace flight and ground system design, development, integration, test, launch, and profit/loss performance for many government and commercial programs including development and flight of launch vehicles and payloads. Mr. Daniels also has extensive experience with business process development and government proposal generation.

Mr. Daniels received a BS in Aerospace Engineering and a MBA from the University of Texas at Austin. He is also an instrument-rated private pilot.
