

INTELSAT|One®

A Powerful Global Network

INTELSAT

Envision. Connect. Transform.

IntelsatOne – perfect for the specialized needs of media organizations, network services providers and government customers

Media organizations, network services providers and government customers will benefit from expanded service features available through IntelsatOne including:

- Enhanced security, including Internet route-free core, traffic separation via MPLS-base VPN capabilities, and security embedded at the service layer
- Increased visibility and control of services operating across the Intelsat network
- Accelerated provisioning times for new services
- Easy access to any of Intelsat’s award-winning teleport facilities and MCPC platforms

Network Services, Telecom and Government

IntelsatOne is the best solution for supporting your customers’ increasing demand for secure, high-bandwidth applications:

- Reap the benefits of true convergence, with voice, video and data solutions delivered over a single connection
- Provide global coverage on the satellite industry’s largest IP/MPLS terrestrial network, fully integrated with the world’s largest satellite fleet
- Develop an expanded range of value-added service offerings based on a single delivery platform
- Deliver enhanced network products such as IPv6 next-generation IP services, DVB-S2 trunking and MPLS VPN

Network Services, Telecom and Government Offerings Include:

- IntelsatOne Network Broadband (NBB)
- IntelsatOne NBB Global Maritime
- IntelsatOne Mobility
- IntelsatOne Internet Trunking Service, Dedicated Carrier & DVB Service
- IntelsatOne International Private Line
- IntelsatOne Teleport Services

Media Services

IntelsatOne offers an easy and efficient path for the future growth of your media capabilities:

- Deliver multiple applications – such as HD, 3D, SD, streaming video, store & forward, confidence return links, data and voice – over a single circuit
- Provide improved user controls, including user-scheduled feeds as well as enhanced self-monitoring and troubleshooting capabilities, ensuring visibility of your services from the production studio to the final destination
- Accelerates provisioning times for new services, getting your content on the air quickly
- Supports linear applications as well as non-linear applications, such as video on demand, digital signage and file exchange
- Delivers service availability levels for live video traffic that are equivalent or higher than conventional offerings

Media Services Offerings Include:

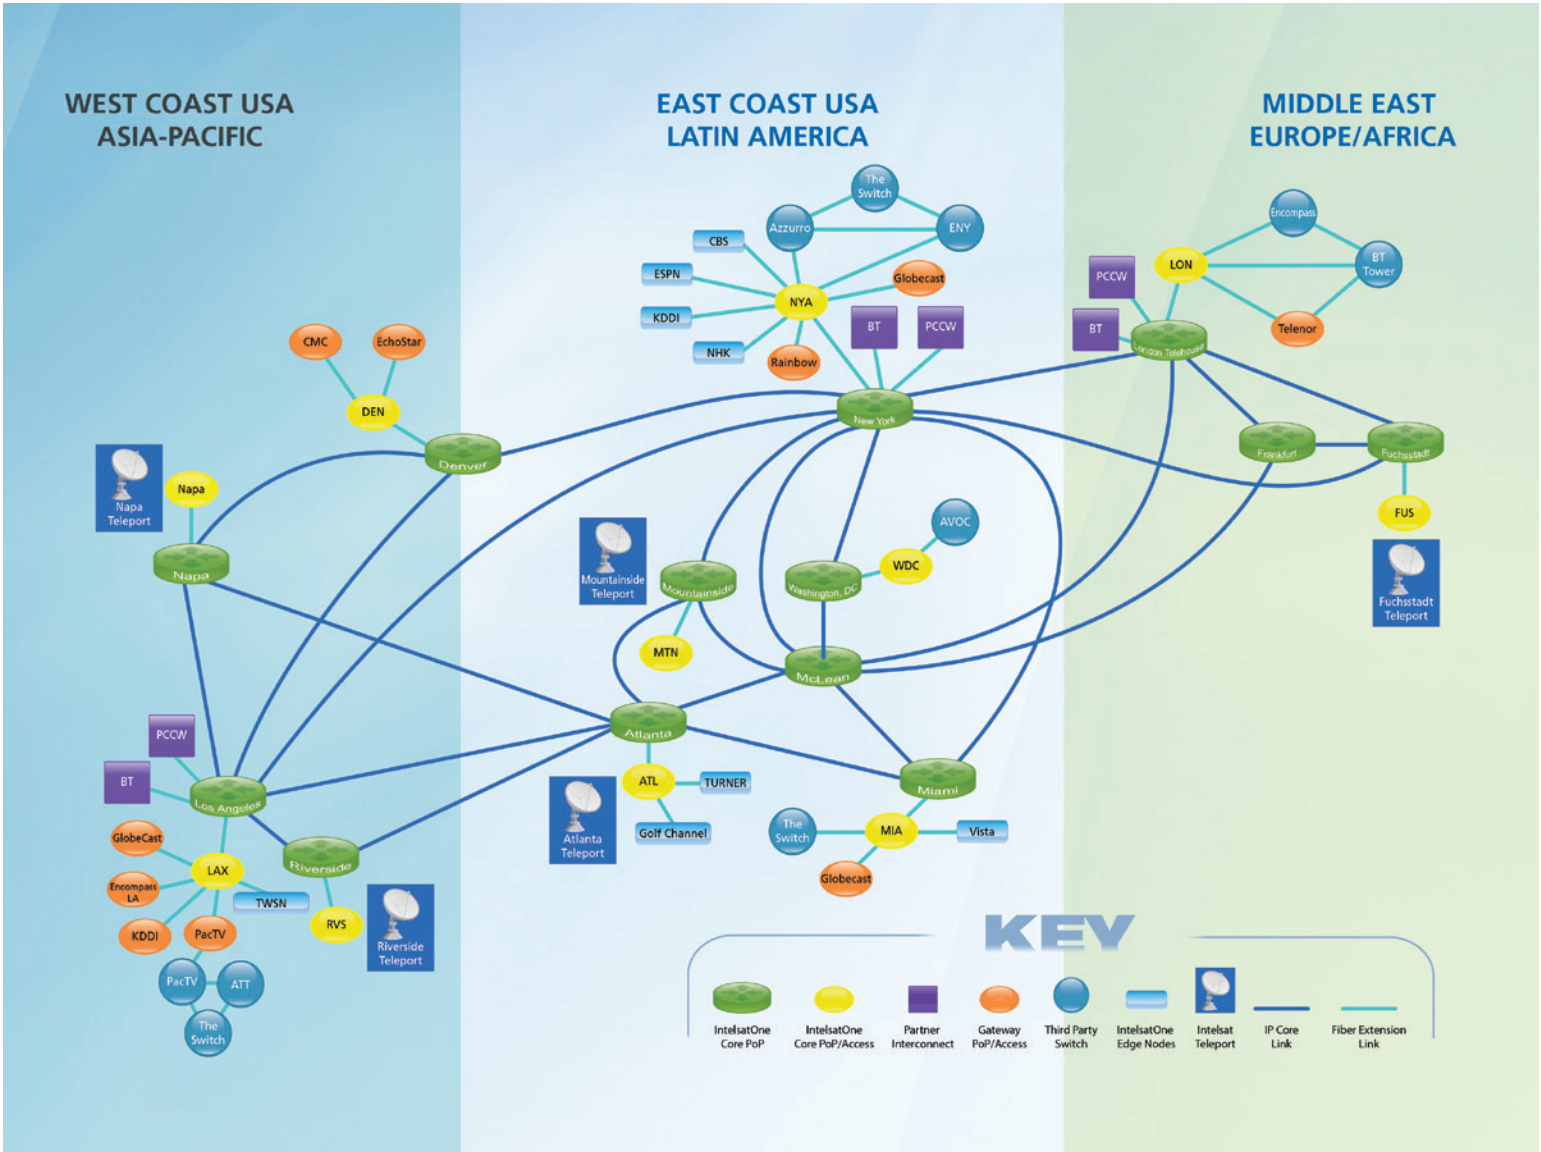

- IntelsatOne MCPC Platforms
- IntelsatOne Media Fiber Services
- IntelsatOne Media Teleport Services

One easy solution to your complex network requirements

IntelsatOne is the clear choice when it comes to deploying multiple managed services and applications through a single and secure interface. No other provider offers Intelsat’s combination of global reach, managed services, years of experience, and reputation for quality, security and reliability.

IntelsatOne Network Architecture

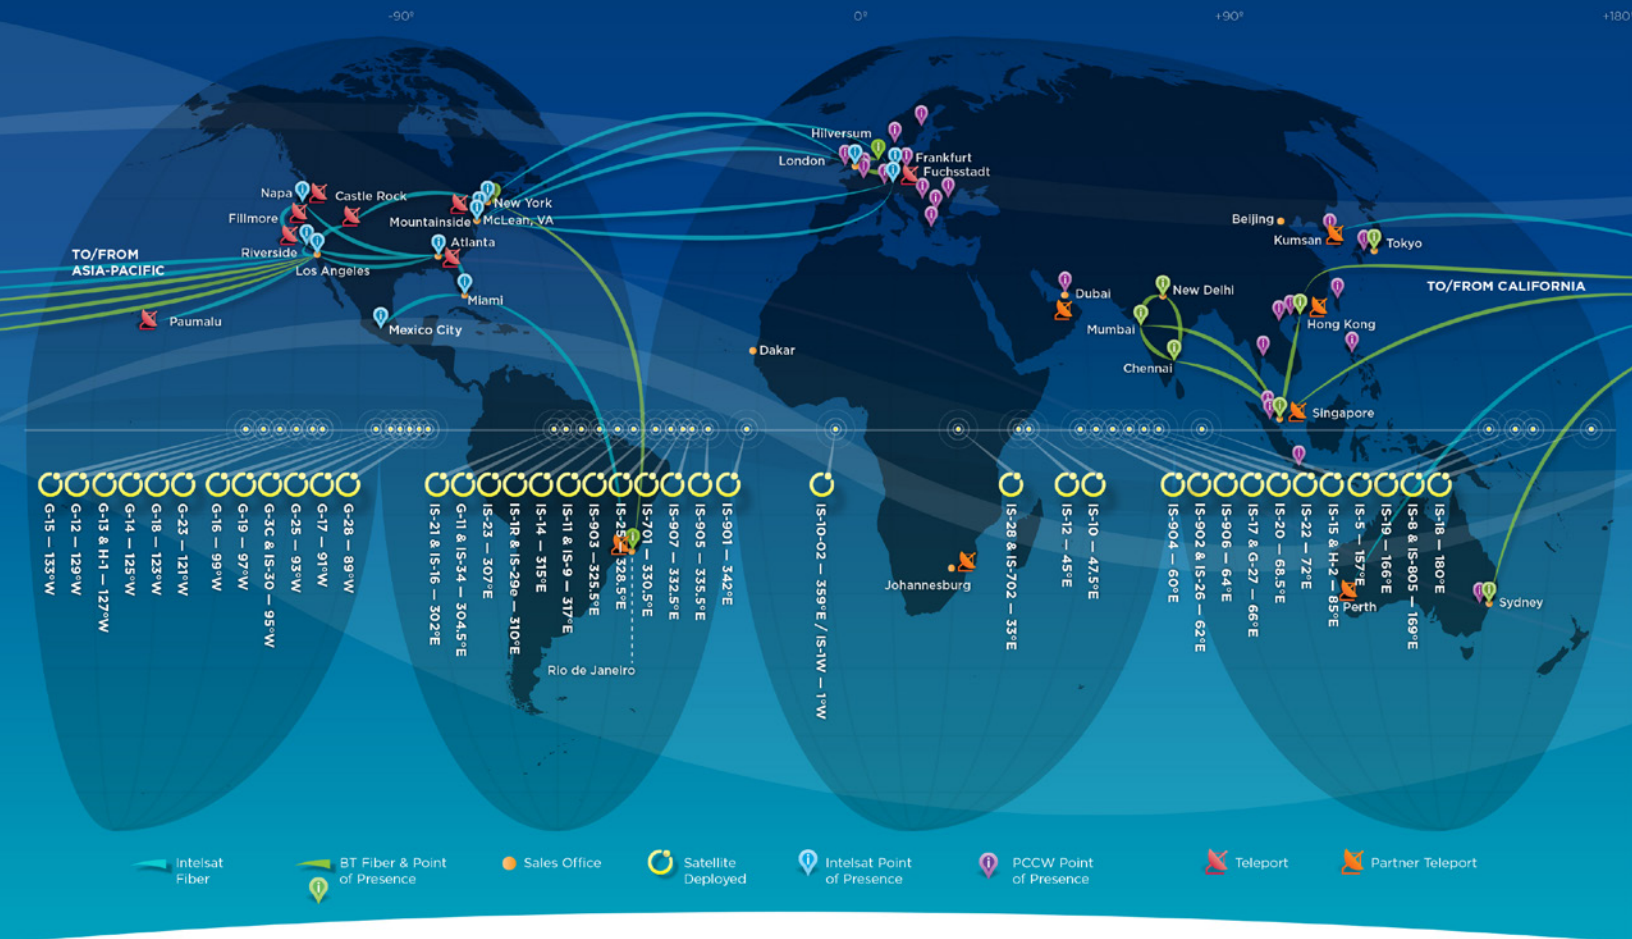

When it comes to our terrestrial network, “One” says it all

- One global, terrestrial architecture, consisting of an IP/MPLS-based fiber network, teleports, and points of presence – fully integrated with the world’s largest satellite fleet
- One simple interface for multiple high-bandwidth applications
- One source for a variety of managed, converged services and solutions
- One easy and efficient path for future growth

“One” also represents Intelsat’s singular commitment to security, reliability and customer support

Intelsat Global Network

Intelsat operates the world's first Globalized Network, delivering high-quality, cost-effective video and broadband services anywhere in the world. Intelsat's Globalized Network combines the world's largest satellite backbone with terrestrial infrastructure, managed services and an open, interoperable architecture to enable customers to drive revenue and reach through a new generation of network services.

Thousands of organizations serving billions of people worldwide rely on Intelsat to provide ubiquitous broadband connectivity, multi-format video broadcasting, secure satellite communications and seamless mobility services. The end result is an entirely new world, one that allows us to envision the impossible, connect without boundaries and transform the ways in which we live.
